SUMMARY

Junior Software Developer with hands-on experience building full-stack applications using Angular, Java, Spring Boot, C#, and PostgreSQL. Familiar with RESTful API development, input validation, API error handling, and UI testing through personal projects and an IT internship.

EXPERIENCE

On the Job Training

Commission on Audit (COA) – Information Technology Office

Document Signing System – Front-end Developer Intern

- Identified and addressed UI inconsistencies in the Document Signing System to improve interface consistency.
- Reviewed front-end functionality, investigated errors, and assisted with corrections or reporting issues when needed.

ACADEMIC & PERSONAL PROJECTS

BudgetFlow – Personal Budget and Savings Tracker

Technologies: Angular, Java, Spring Boot, Hibernate, JPA, PostgreSQL

- Developed a full-stack budgeting application with an Angular frontend and Spring Boot backend to support personal budgeting and savings goal management.
- Built reactive forms with frontend and backend validation to improve data integrity and provide meaningful feedback for invalid submissions.
- Implemented API error handling and data validation to improve application reliability and ensure consistent handling of user inputs across financial management features.
- Integrated Google Sign-in with Spring Boot to verify Google ID tokens and issue application specific JWTs for authenticated API access.

Sales and Inventory Management System for Racquel Pharmacy – Thesis Project

Technologies: C#, EF Core, Angular, PostgreSQL

- Integrated Angular frontend components with the C# backend to support data exchange and consistent operations across system modules.
- Developed inventory and sales workflows covering purchase orders, stock replenishment, stock entry and adjustments, and point-of-sales (POS) transactions.
- Developed employee and account management features with access controls and timestamped audit logs to track user activities.
- Implemented data archiving and restoration for product, inventory, employee, and related reference data

SKILLS

Backend Development

- C# / ASP .NET Core
- RESTful API Development
- Java, Spring Boot
- Hibernate / JPA

Frontend Development

- Angular (basic knowledge)
- HTML, CSS / SCSS
- TypeScript

Database

- PostgreSQL

Tools and Technologies

- Git / Github
- Postman / Swagger / API Testing

EDUCATION

Bachelor of Science in Information Technology Quezon City, Philippines
